

4G then. 5G now.

Get ready to meet renewed consumer needs.

Enhance your 4G/5G indoor network

Improve your rental yields & renewals

Ensure your business keeps on going

iBUS creates convergent interoperable, reliable and secure digital infrastructure compatible with all existing cellular networks. Our infrastructure is 5G-ready and helps improve business continuity.

Let's start with a free 5G Coverage Assessment

iBUS evaluates your current network coverage to design and deploy In-Building Solutions (IBS) that enable sharing of singular digital Infra for voice and 4G/5G data technologies.

MAXIMUM COVERAGE

Get high-speed 4G/5G coverage at almost

98% of project area

Keep people in your building connected with high-speed network.

- iBUS IBS enables dedicated 4G/5G High Speed Data and Voice Network for improved productivity and business transaction.
- Ensure social media connectivity to meet requirement of indoor activities that generate high traffic.

iBwave

Our networks are designed using iBwave tool to offer seamless and maximum 4G, 5G and Voice coverage.

plug&play

We install a Plug & Play infra which provides level playing field for connectivity. It helps telco operators distribute in-building network with virtually ZERO GTM timelines.

5Ginity

Gear up for next-gen convergence

iBUS IBS solutions equips your buildings with 5G-ready infra for seamless integration and IoT capabilities.

iBUS

Aesthetics

Retain aesthetic beauty of your buildings.

Don't worry about multiple operators setting up multiple network infrastructure

Optimum space usage

iBUS IBS works in-line with interiors and helps maintain aesthetics by optimizing Telcom Shafts and Cable Tray.

Shared Infrastructure Provider

All operators have access to the same infrastructure - antennas, cables - which help enable level playing field.

One Infrastructure Provider (iBUS IBS) takes charge of managing the system while your building is poised to provide high-speed connectivity and hyper-personalised user experience.

Diverse use cases. Limitless possibilities.

Improve footfall and shopping experience (IR & VR) in Malls

Ensure high-speed mobile network with low latency for IoT connectivity in tech hubs

Create highly resilient connectivity for life-critical healthcare processes

Improve guest experience in Hotels with IoT use case solutions

How iBUS IBS works

iBUS IBS delivers 100% CapEX return

Through CapEx Reimbursement model

iBUS IBS gives you:

Dedicated network

Distributed Antenna System (DAS) enables dedicated Network within the building for seamless Voice & Data coverage.

Singular digital infra

Deployment of wideband antennas enables sharing of singular digital Infra for voice and 4G/5G data technologies.

Maximum coverage

Designed to meet 98% coverage area indoor be it basements, common area, lift lobby and saleable area.

iBUS helps Telcos reduce GTM timeline and can service clients based on business justification and user experience by utilizing agreed upon MSA terms of use for a minimum period of 5 to 15 years.

From the house of

IBUS

iBUS Group delivers digital infrastructure solutions, with a full suite of offerings that enable networks for businesses and institutions.
